

# SUSTAINABILITY

A steep change in  
lubricant value proposition

Energy  
efficiency  
in use

Reduction of  
product carbon  
footprint

Reduction of  
finite resource  
consumption

20% of the world's total energy  
consumption is used to overcome friction

Scope 3 represents **up to 99%**  
of manufacturing companies  
emissions

50% of used lubricants  
can be recycled

# Driving sustainable innovation

Pro-Environment Products

Project Air

Internal Carbon Pricing

An industry-wide methodology is key for the industry to be able to provide **reliable** and **comparable** data
